Family Onboarding Customization Workbook

Fill in Your School's Details to Personalize the Onboarding Playbook

Published by the Montessori Foundation

How to Use This Workbook

This workbook is the companion to the New Family Onboarding Playbook. While the playbook provides a complete example using a fictional school, this workbook is where you make the content your own.

1. Complete Part 1 (School Information). This captures the foundational details that appear throughout every email: your school name, contact people, hours, policies, and age levels served.
2. Complete Part 2 (Email Customizations). Each email has fields for school-specific information like guide names, locations, schedules, and unique policies. Fill in only the fields that apply to your school.
3. Complete Part 3 (Resources and Content). Add your school's articles, blog posts, handbook links, and any other resources you want families to receive during onboarding.
4. Complete Part 4 (Touchpoint Assignments). Assign staff members to each personal touchpoint (welcome calls, guide notes, observations, check-ins).
5. Use the completed workbook to customize the playbook emails, or import them directly into Montessori Growth Suite.

Montessori Growth Suite Users

If your school uses Montessori Growth Suite, the information in this workbook maps directly to the custom fields in the automation workflow. Once you complete this workbook, use the companion MGS Integration Guide to import and configure your automated onboarding sequence.
